Dear, Name Here

Are you looking for a Web designer/programmer?

- Who has the knowledge of HTML and CSS under their belt?
- Who can also use Python and Java Script
- And if need be, even do PHP and MySQL

If so, then look no further if you see in my enclosed resume that I meet all the skills that you need for the job.

If we can I would very much like to meet and see about inquiring sod a job to have a more face-to-face meeting to talk about more of my skill and see if I am what you are looking for. If so, would love to you able to contact you again if to your liking for the job.

Thank you for looking over my resume and I am looking forward to meeting you if you want me for the job.

Sincerely,

Noah Knight
